

Expresspack

Economy Hand Pack Station

Combi and 3M join forces to provide a value-priced hand packing station solution for companies that require more throughput than manual case erecting, packing and sealing can provide. This integrated system provides optimum operator comfort by reducing lifting, reaching, stretching, bending and twisting in the packaging operation. Efficient and durable, the Expresspack combines a Combi CE-10 Case Erector, a custom Hand Pack Station and a 3M-Matic™ 120af Case Sealer into a cost effective work cell.

Features:

- Hands-free case indexing
- High capacity powered case magazine holds 150-200 cases
- Standard low case & low tape alarms with stack light assure continuous operation
- Case counter
- Allen Bradley controls on case erector
- Safety interlocked guarding restricts access to moving parts
- Sealer has spring-loaded side belt drive with twin gear motors for heavy-duty performance
- 10 case per minute operation for medium speed packaging lines
- 3M Accuglide™ II+ taping heads with open tape threading path for faster changeovers
- Fully automatic flap folding with top and bottom sealing
- Experience the flexibility of using a wide range of product in-feed conveyors
- Modular Design: Use the erector or sealer as a stand-alone unit by releasing Q.D. fittings
- 3 Year Warranty (excludes normal wear items, see operator manual for details)

Expresspack

It's in the
Combination

Applications:

- Products that require inspection prior to packing
- Short run or variable product sizes
- Products that are difficult to handle automatically
- Packaging operations where full automation is infeasible
- Filling boxes with loose, granular, frozen or bakery products that require bagging

Options:

- Right Hand or Left Hand Execution
- 3 inch 3M Accuglide™ II+ Tapehead
- Heavy Duty Machine Casters

Electrical Service:

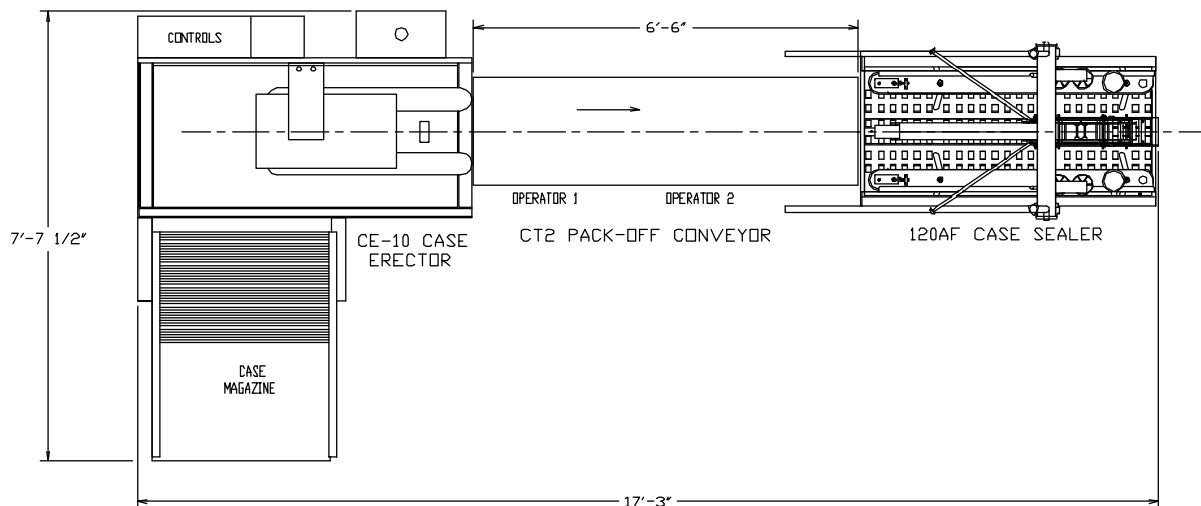

110 volt / 1 ph / 22A
115 volt / 1 ph / 2.8A
